# Wicked Problem

## A solution to a Wicked Problem within the area of Education

We have identified a wicked problem in the area of education, specifically the learning of foreign languages as an adult.

# Research Plan & Discussion Plan

**Target Population** included Adults who have studied or are currently studying a foreign language.

**Goal:** To understand their barrier or limitations and needs when learning a foreign language as an adult.

# Research Key Takeaways

60% of our users had only **1-2 hours** a week to focus on their learning goals

Coding by theme shows **Social learning** and **immersion** being impactful.

**1-2 Hours  
Weekly**

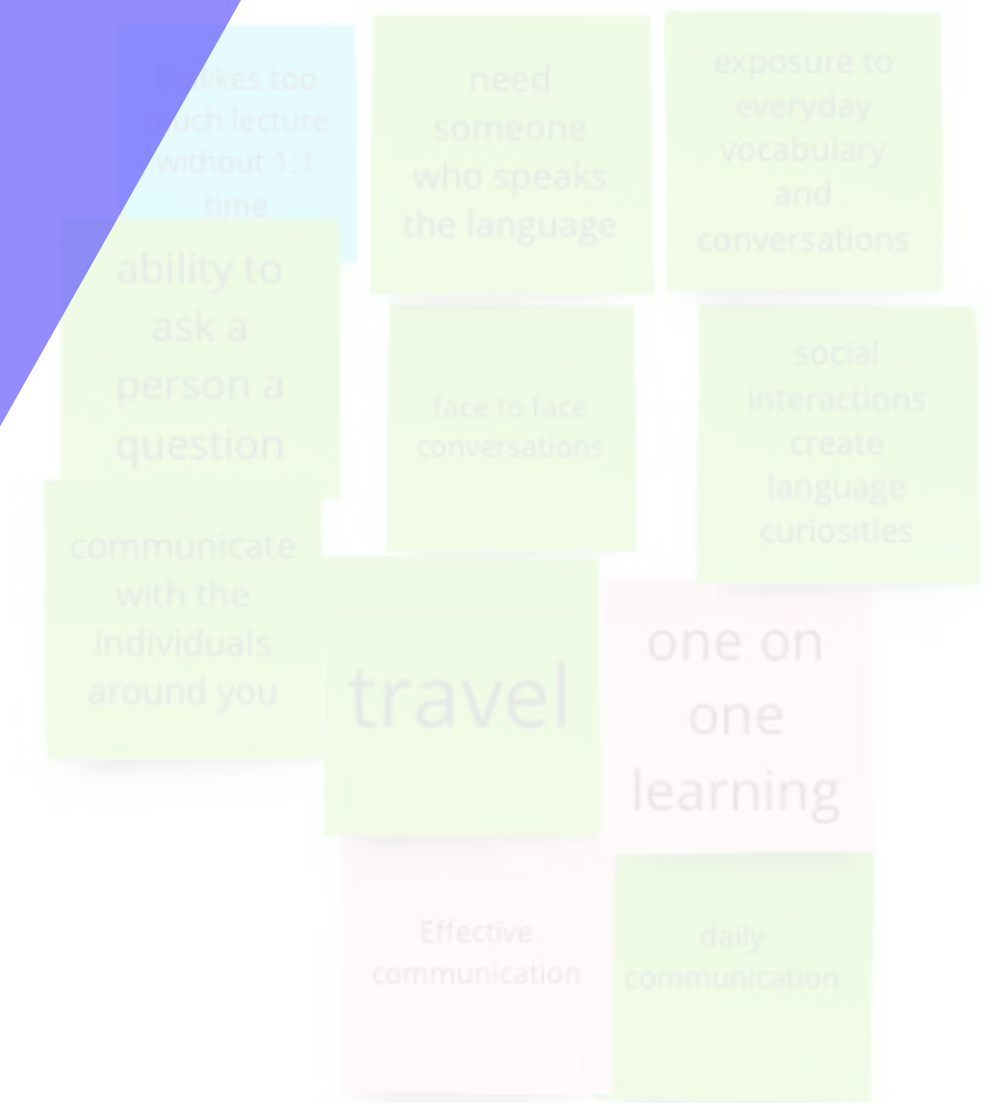

# Synthesize Data

## Results showed:

- There is a lack of social input
- Platforms all sound robotic
- People want one on one learning experiences
- They like interactive or engaging activities
- To understand cultural accents.

## Social Learning

## Pain Points

## HMW Statement

How might we create a flexible, interactive, one to one learning environment, for adult language learners that would enable them to fluently and expressively converse with a native speaker.

Our data shows that there is a gap in the market for social learning in which students are able to practice immersively and apply critical thinking to engage in conversation with native speakers.

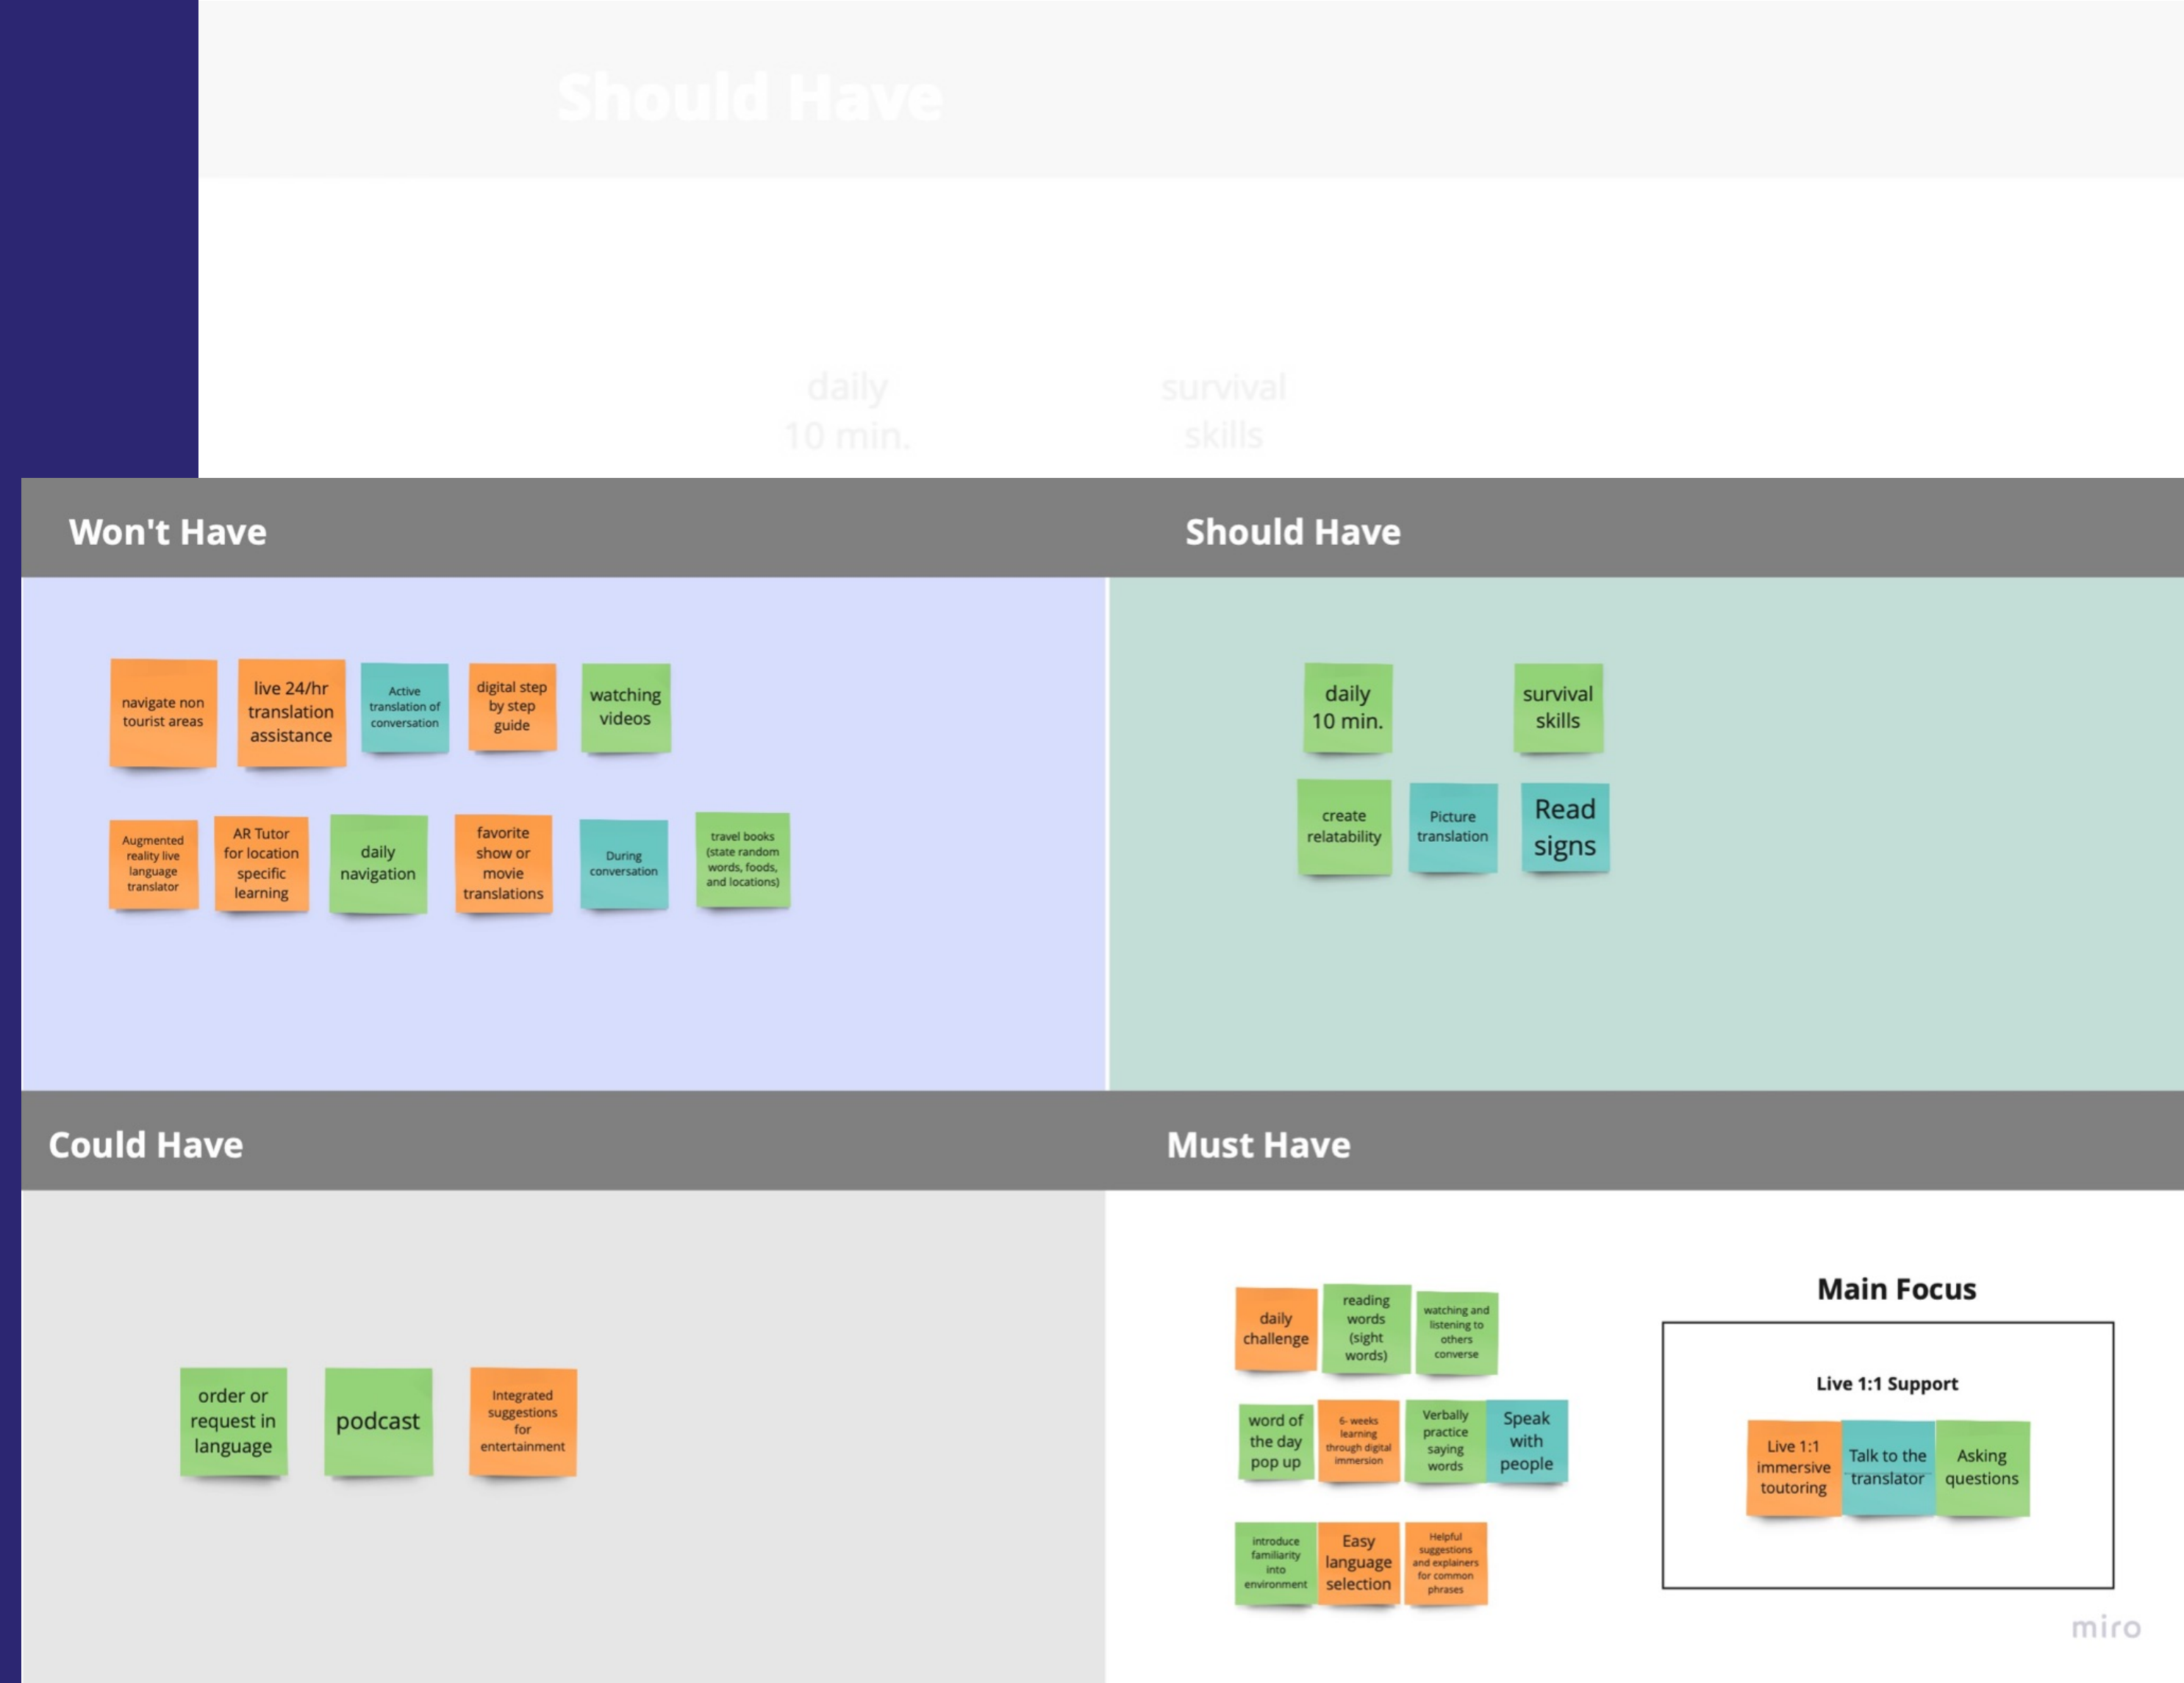

# Creative Matrix

	Adults learning a language for work	Adults learning a language for relationships	Adults learning a language for travel
Activity (Why App)	<ul style="list-style-type: none"> <li>Need to communicate with employees</li> <li>Better understanding</li> <li>create relatability</li> <li>Build relationships</li> <li>introduce familiarity into environment</li> </ul>	<ul style="list-style-type: none"> <li>for Family</li> <li>Need to communicate with in-laws</li> <li>language is central to the heart</li> <li>to be more welcoming</li> <li>Understand what is being said about you</li> <li>Father-in-law</li> </ul>	<ul style="list-style-type: none"> <li>Speak with people</li> <li>Can get places</li> <li>order food</li> <li>navigate non tourist areas</li> <li>survival skills</li> <li>Read signs</li> <li>daily navigation</li> </ul>
Features (Offers what)	<ul style="list-style-type: none"> <li>Augmented reality live language translator</li> <li>Practice partner challenge</li> <li>Calendar integration for pop ups and practice</li> <li>podcast</li> <li>youtube</li> </ul>	<ul style="list-style-type: none"> <li>Helpful suggestions and explainers for common phrases</li> <li>Live 1:1 immersive tutoring</li> <li>attempting to utilize what you learn when greeting or engaging in conversation</li> <li>favorite show or movie translations</li> </ul>	<ul style="list-style-type: none"> <li>Picture translation</li> <li>integrated suggestions for entertainment</li> <li>Reminders and hourly pop ups</li> <li>word of the day pop up</li> <li>watching and listening to others converse</li> <li>AR Tutor for location specific learning</li> <li>practice in mirror</li> </ul>
Location	<ul style="list-style-type: none"> <li>During meetings</li> <li>After work</li> <li>In office before work day starts.</li> <li>with coworkers</li> <li>during a presentation</li> </ul>	<ul style="list-style-type: none"> <li>at Home</li> <li>before a visit or traveling</li> <li>During conversation</li> <li>Throughout the day intermittently with individuals who speak the language</li> </ul>	<ul style="list-style-type: none"> <li>In a shop</li> <li>before traveling</li> <li>on the airplane</li> <li>daily 10 min.</li> <li>order or request in language</li> <li>During travel</li> </ul>
How	<ul style="list-style-type: none"> <li>watching videos</li> <li>browser extension</li> <li>audio recordings</li> <li>Partner matching with native speaker</li> <li>Talk to the translator</li> </ul>	<ul style="list-style-type: none"> <li>asking relatives questions</li> <li>6- weeks learning through digital immersion</li> <li>1 hour a week with 1 hour live tutoring</li> <li>Active translation of conversation</li> </ul>	<ul style="list-style-type: none"> <li>travel books (state random words, foods, and locations)</li> <li>reading words (sight words)</li> <li>digital step by step guide</li> </ul>

# MoSCow Matrix

Our main focus will be to create a solution that offers **live support** in the form of **one-to-one immersive tutoring with native speakers.**

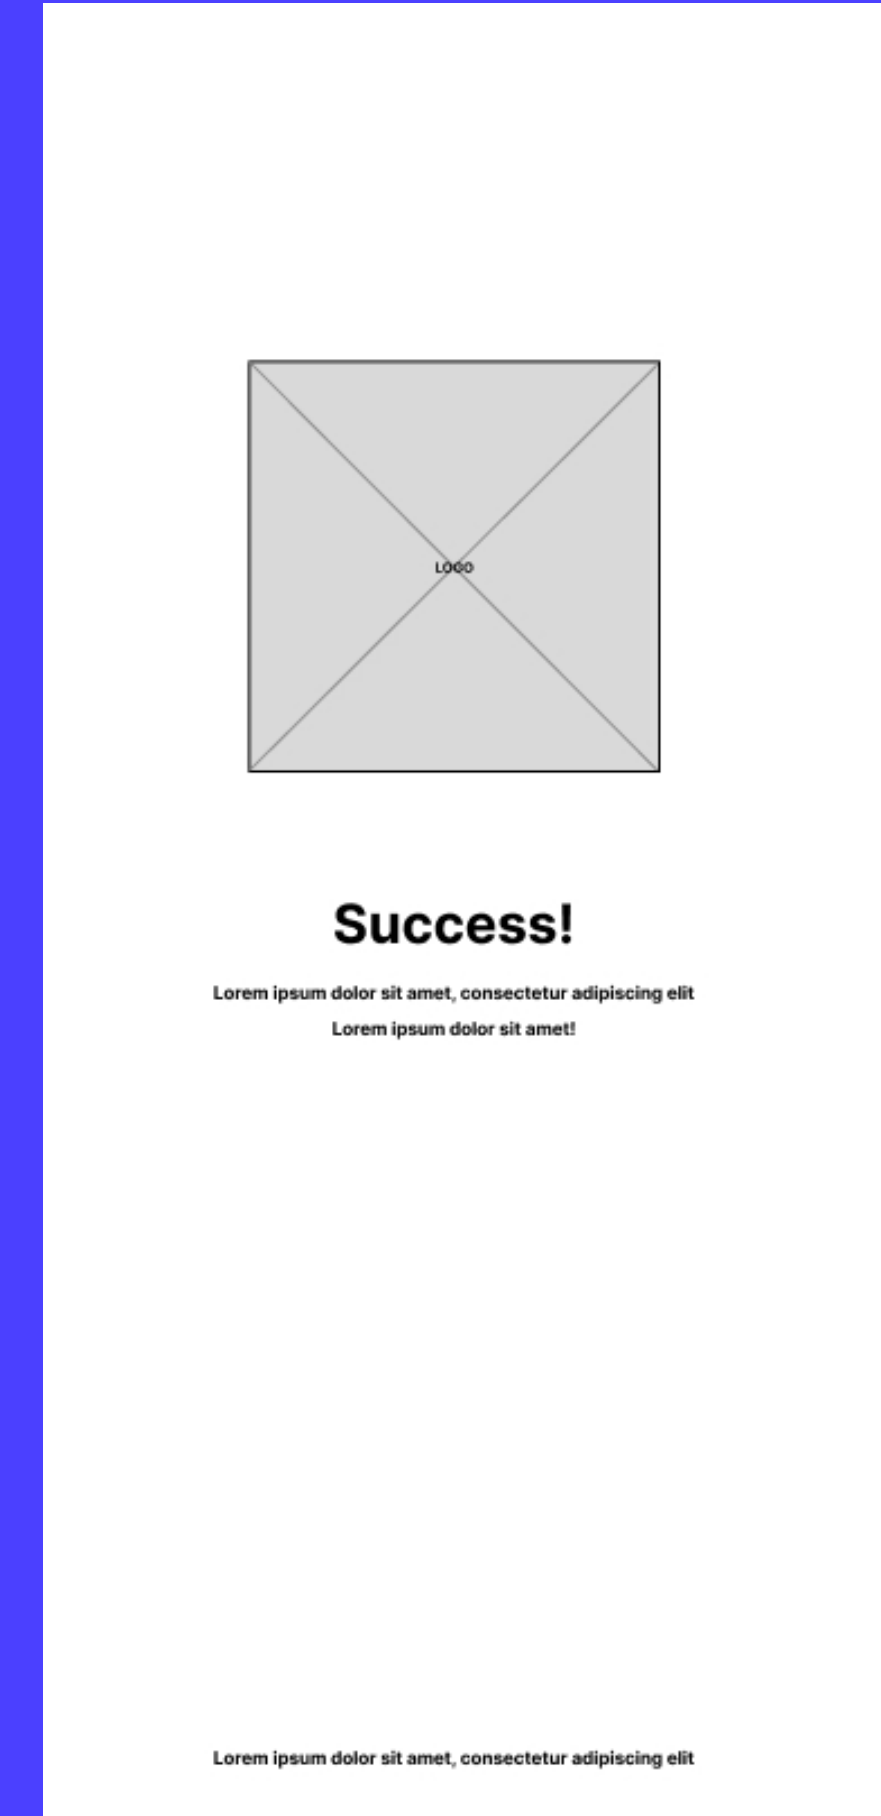

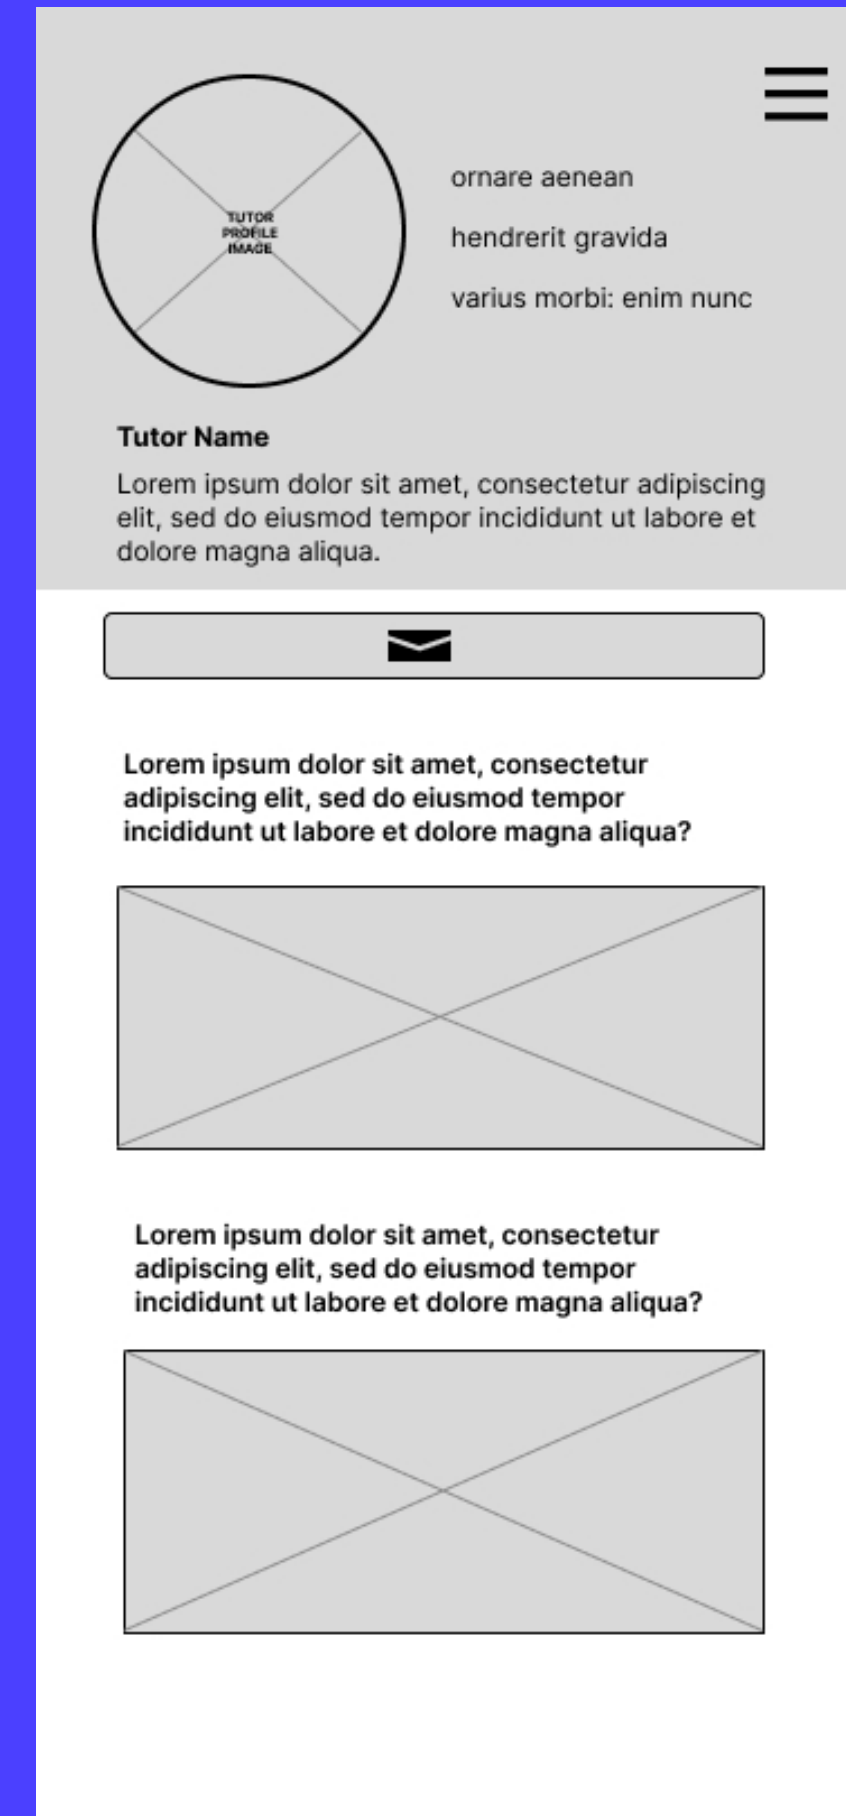

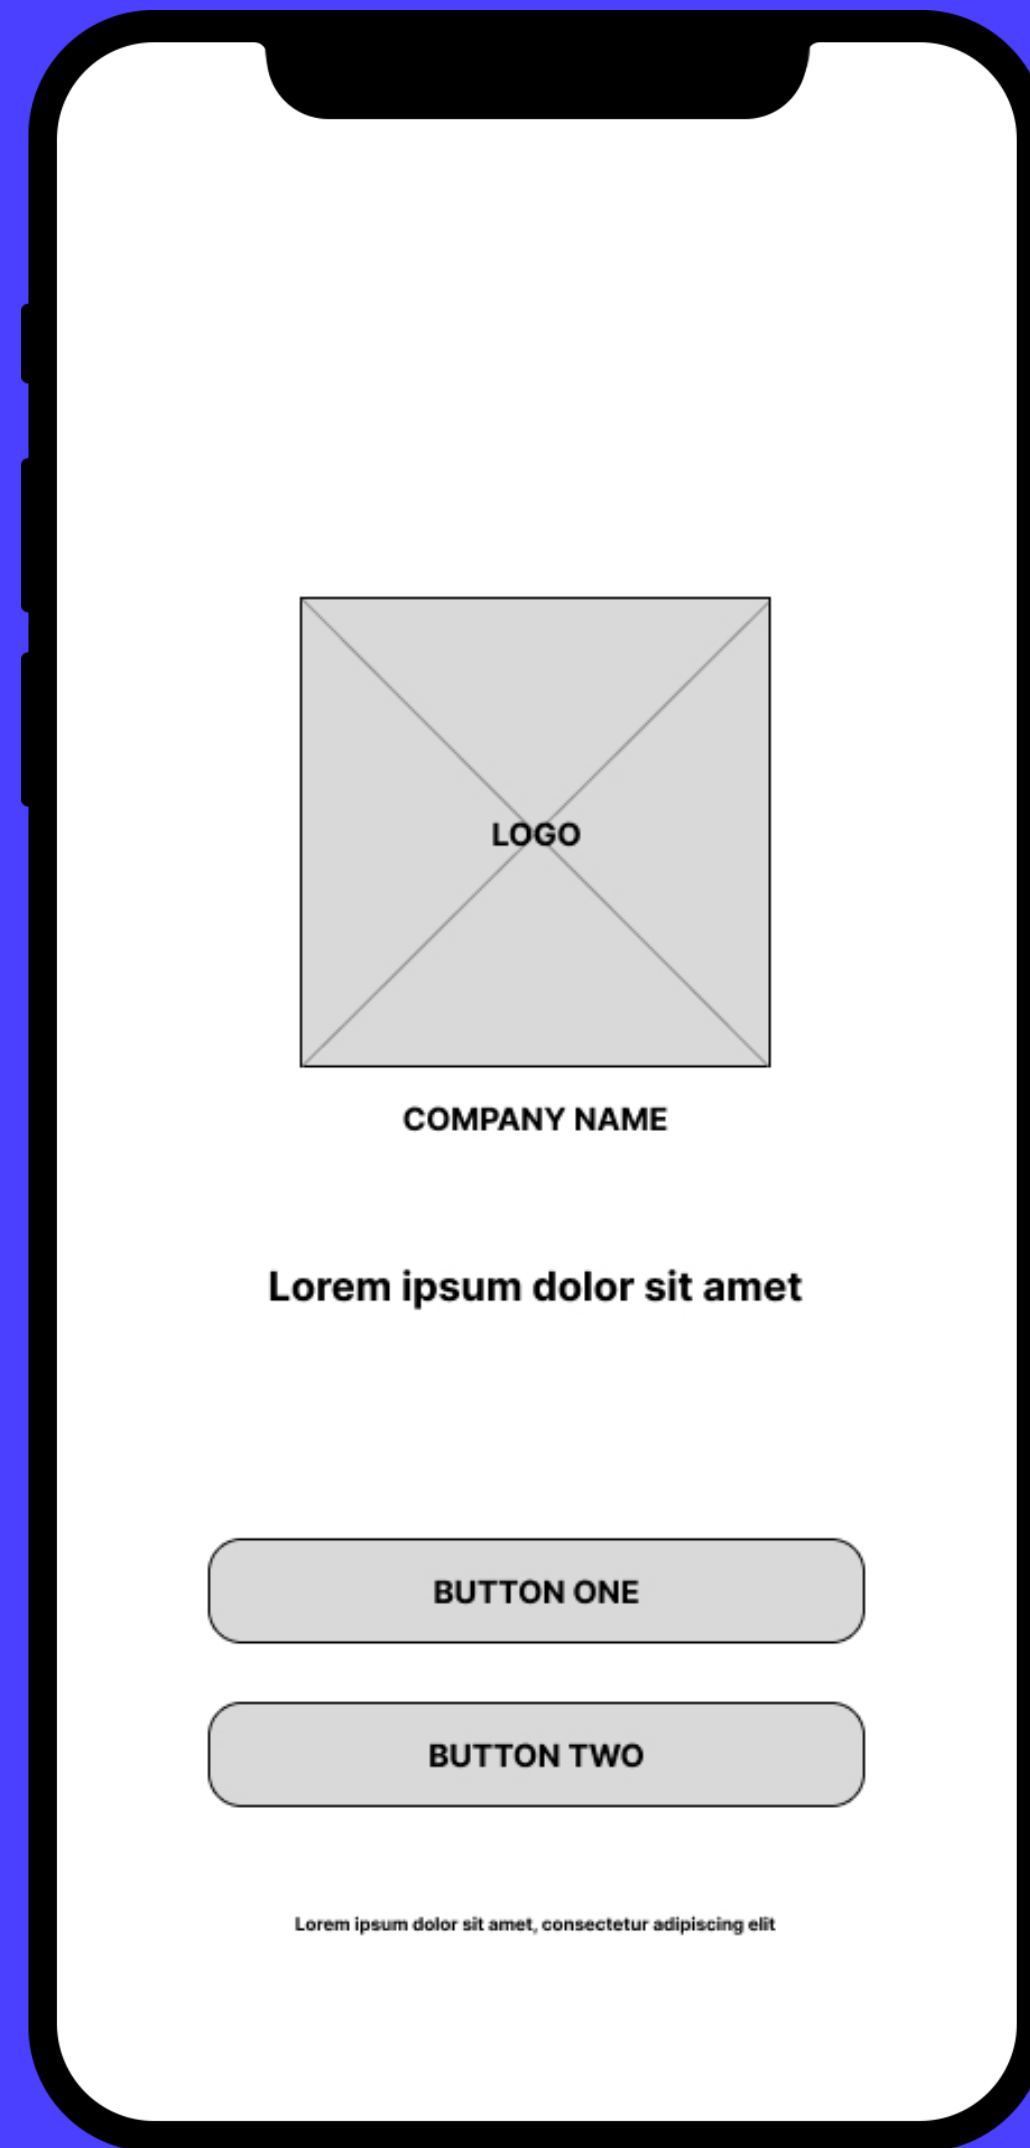

USER PERSONA

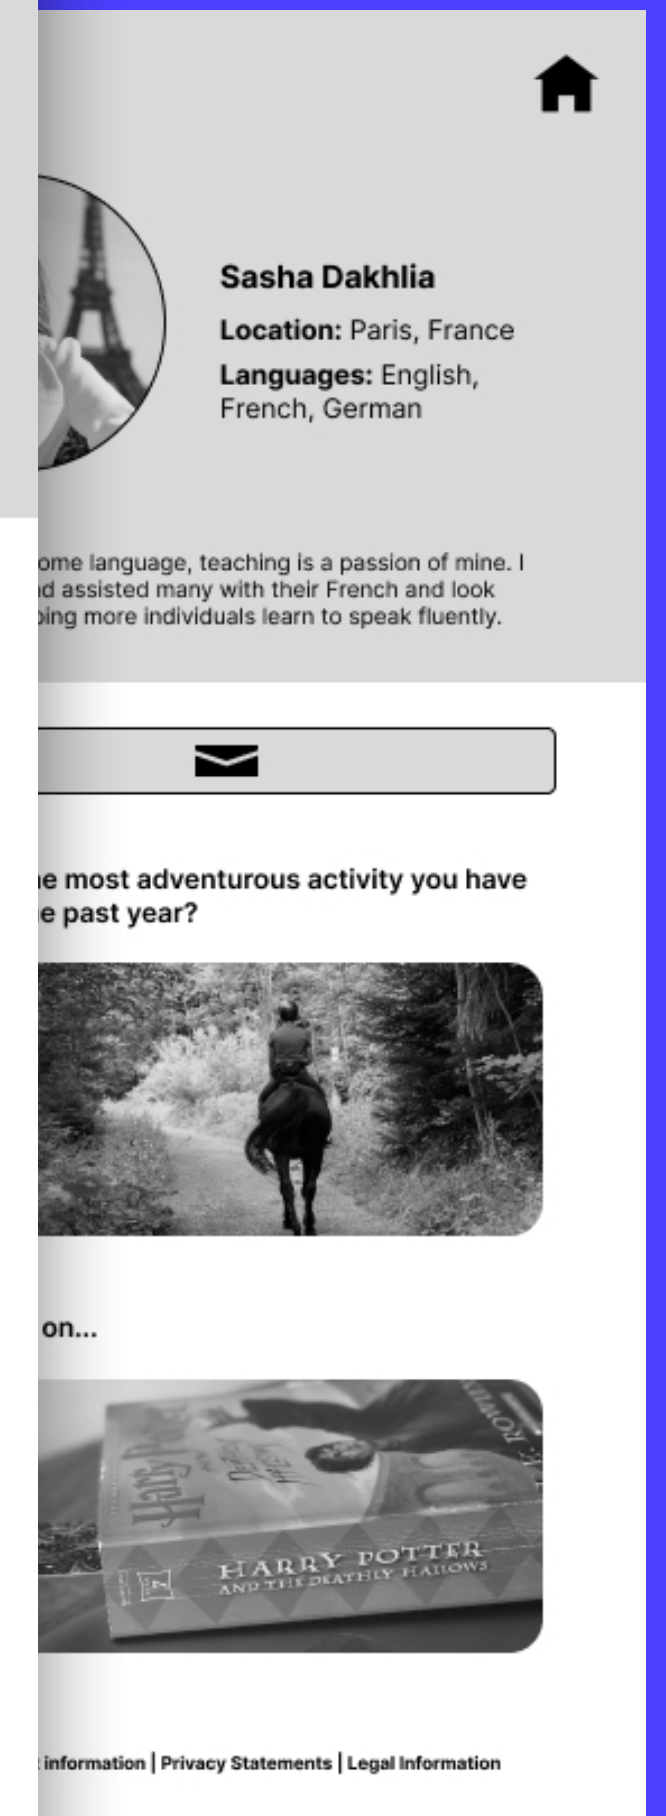

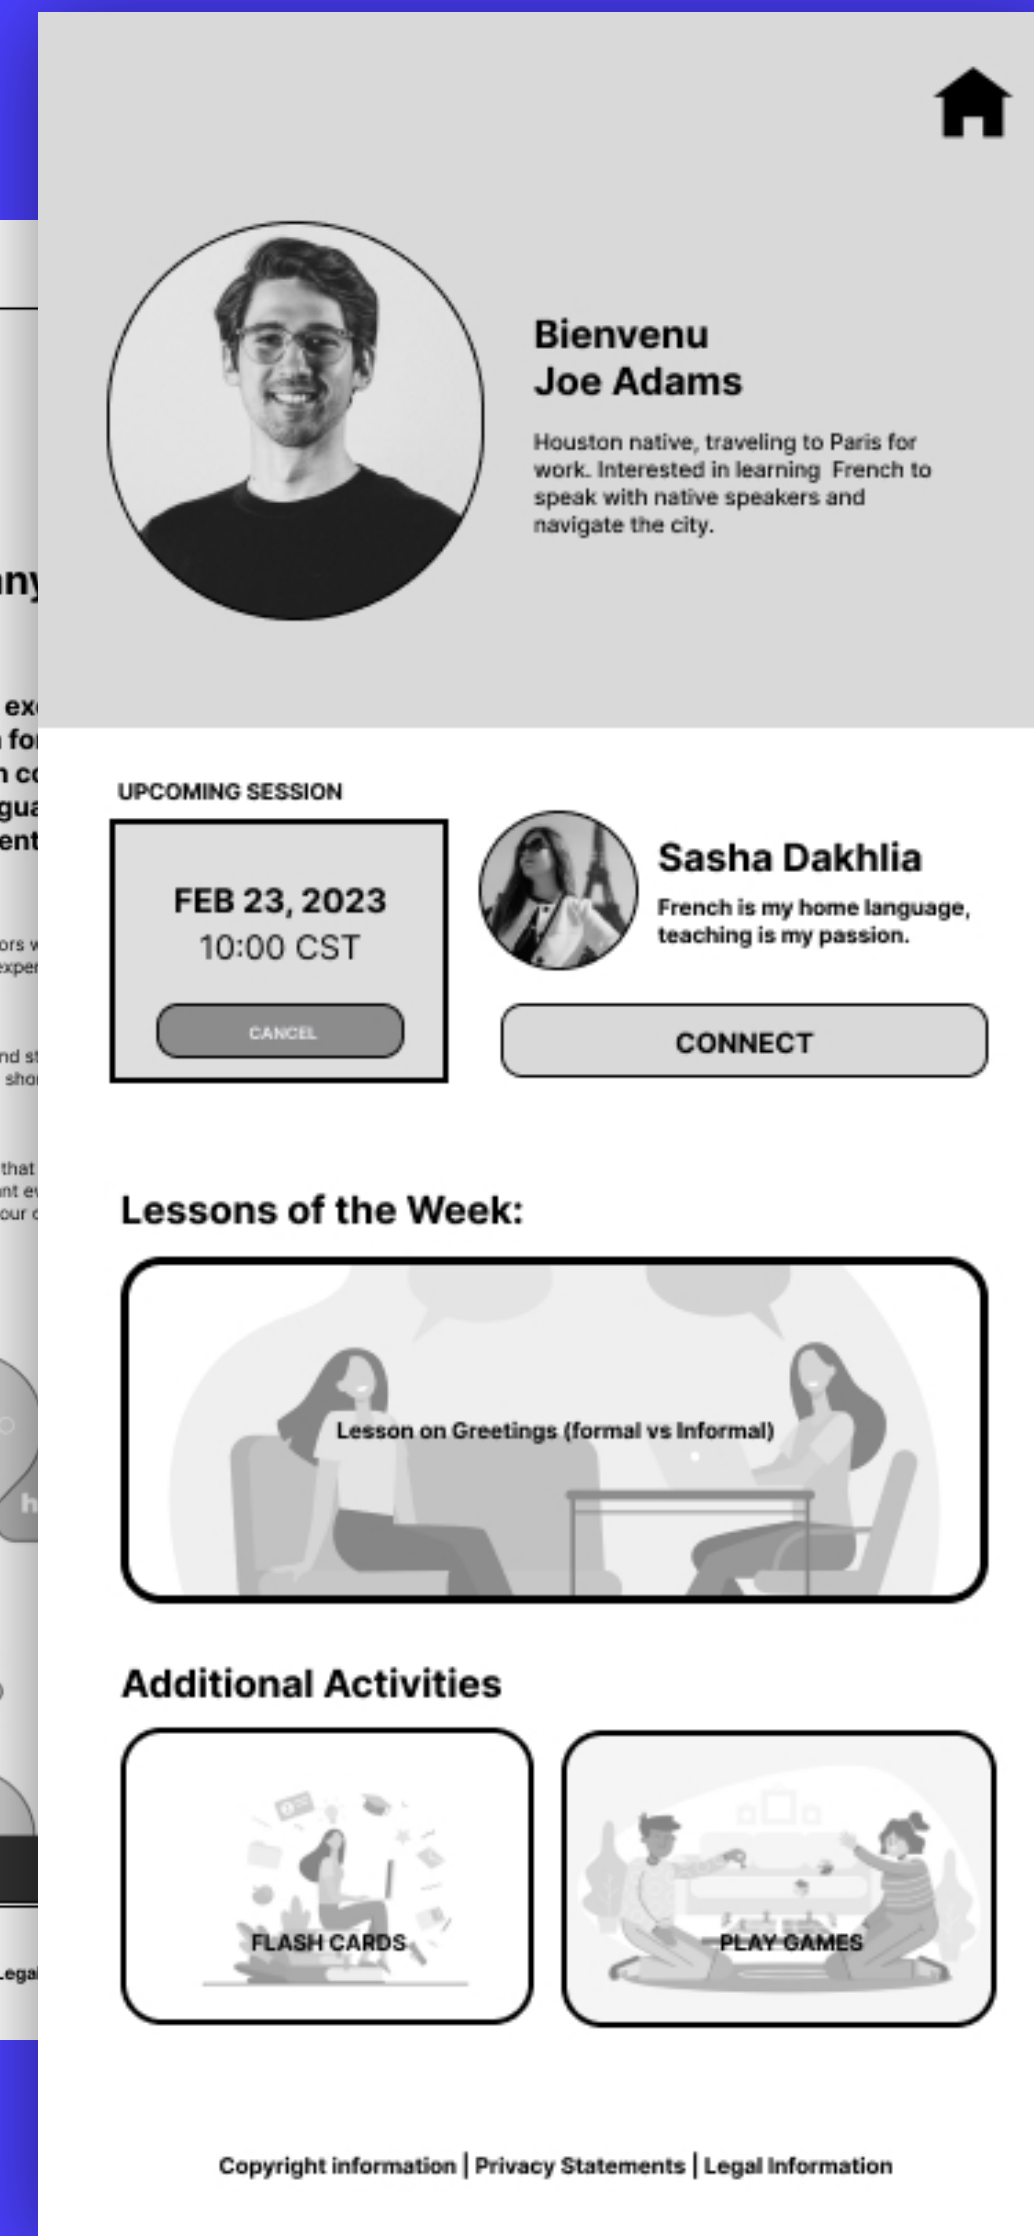

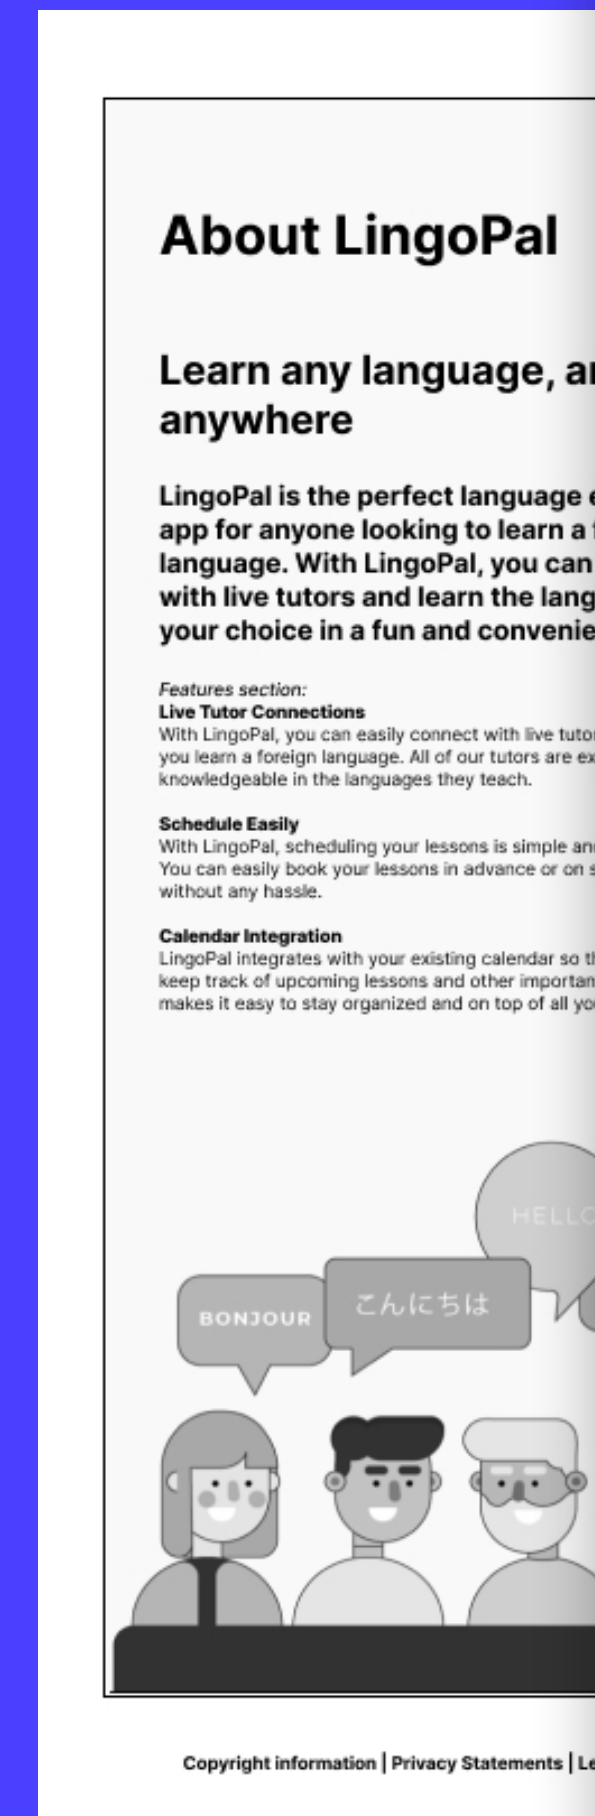

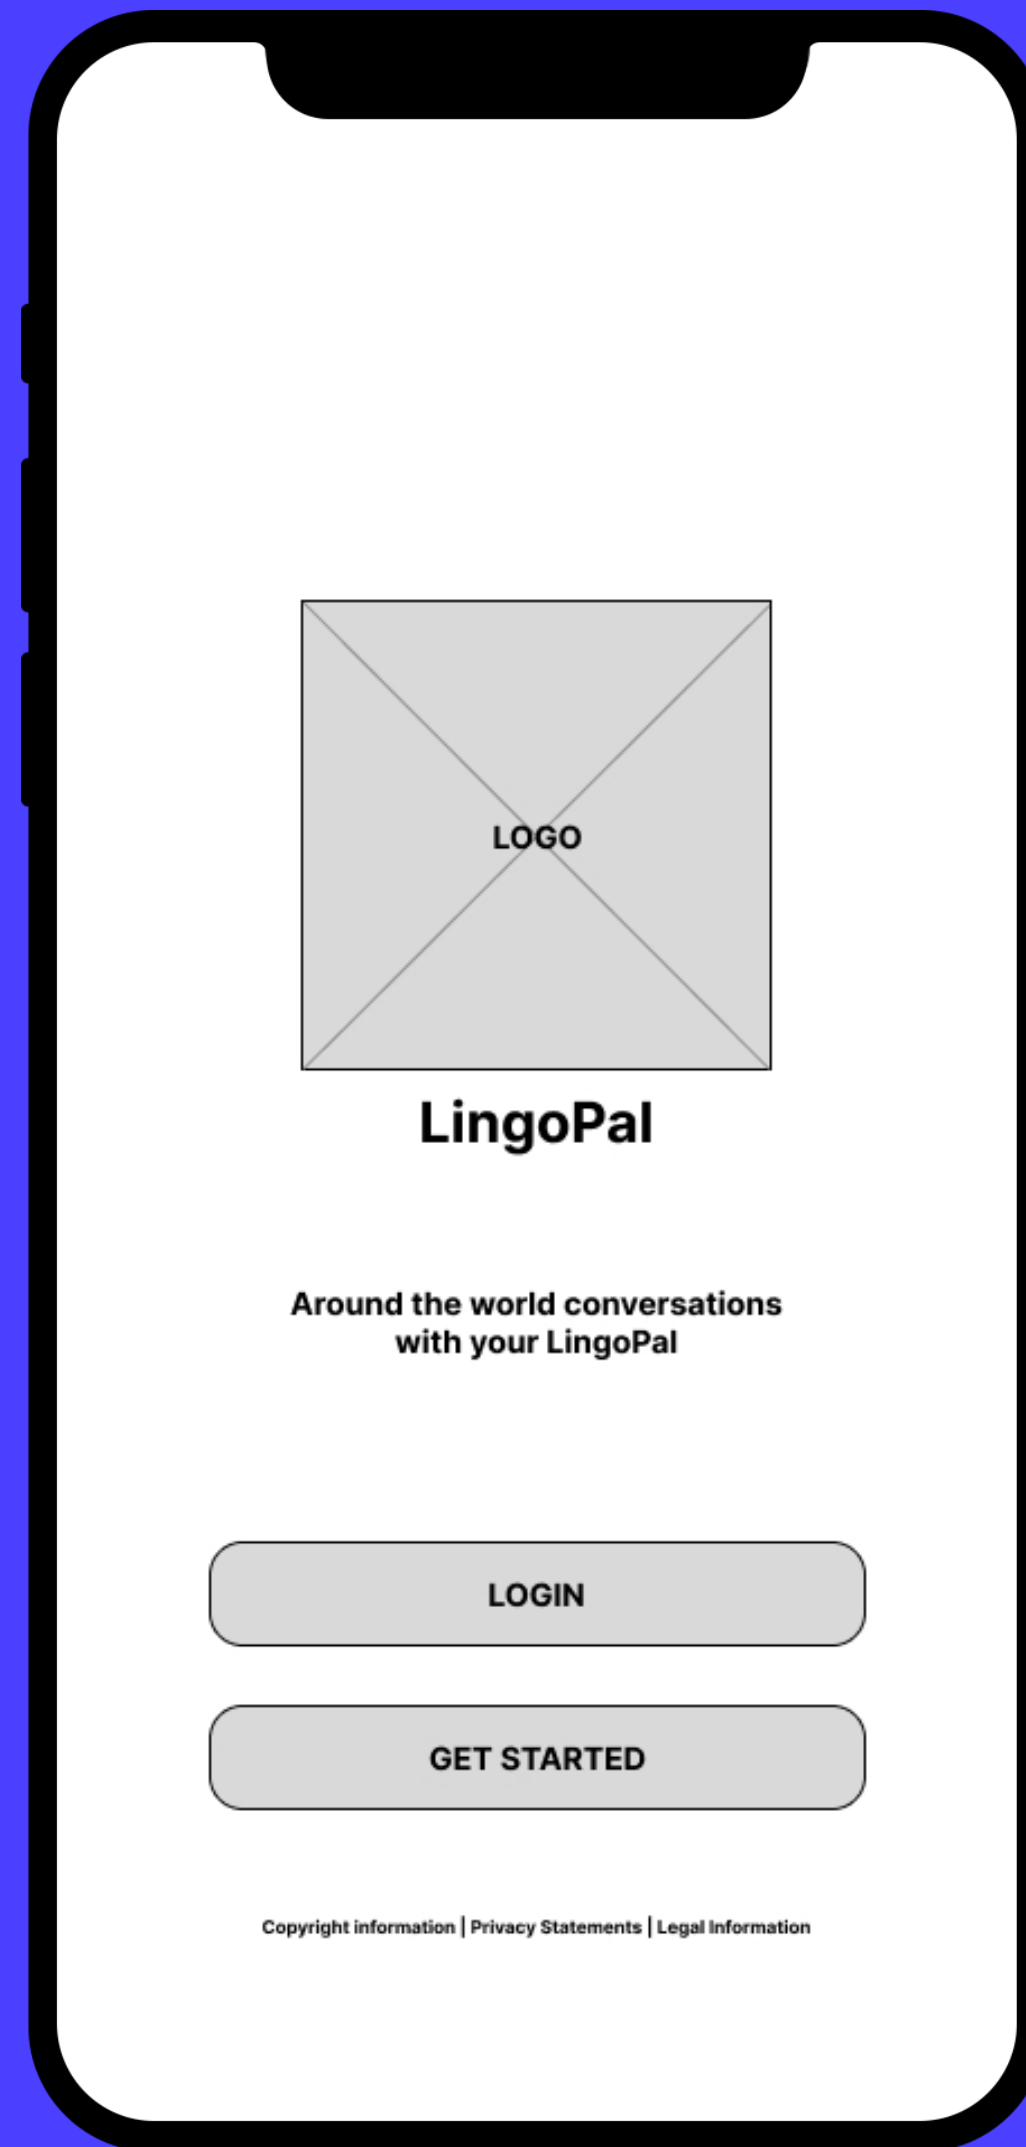

**Joe is a 30 year old  
working in sales  
living in Houston.**

- Wants to learn conversational French to speak with native speakers and navigate the city.
- Express his personality in French.
- To understand colloquial language from native speakers.

# Prototype Wireframes

# Iterated Prototype Wireframes

# User Testing

## Moderated In-Person Testing

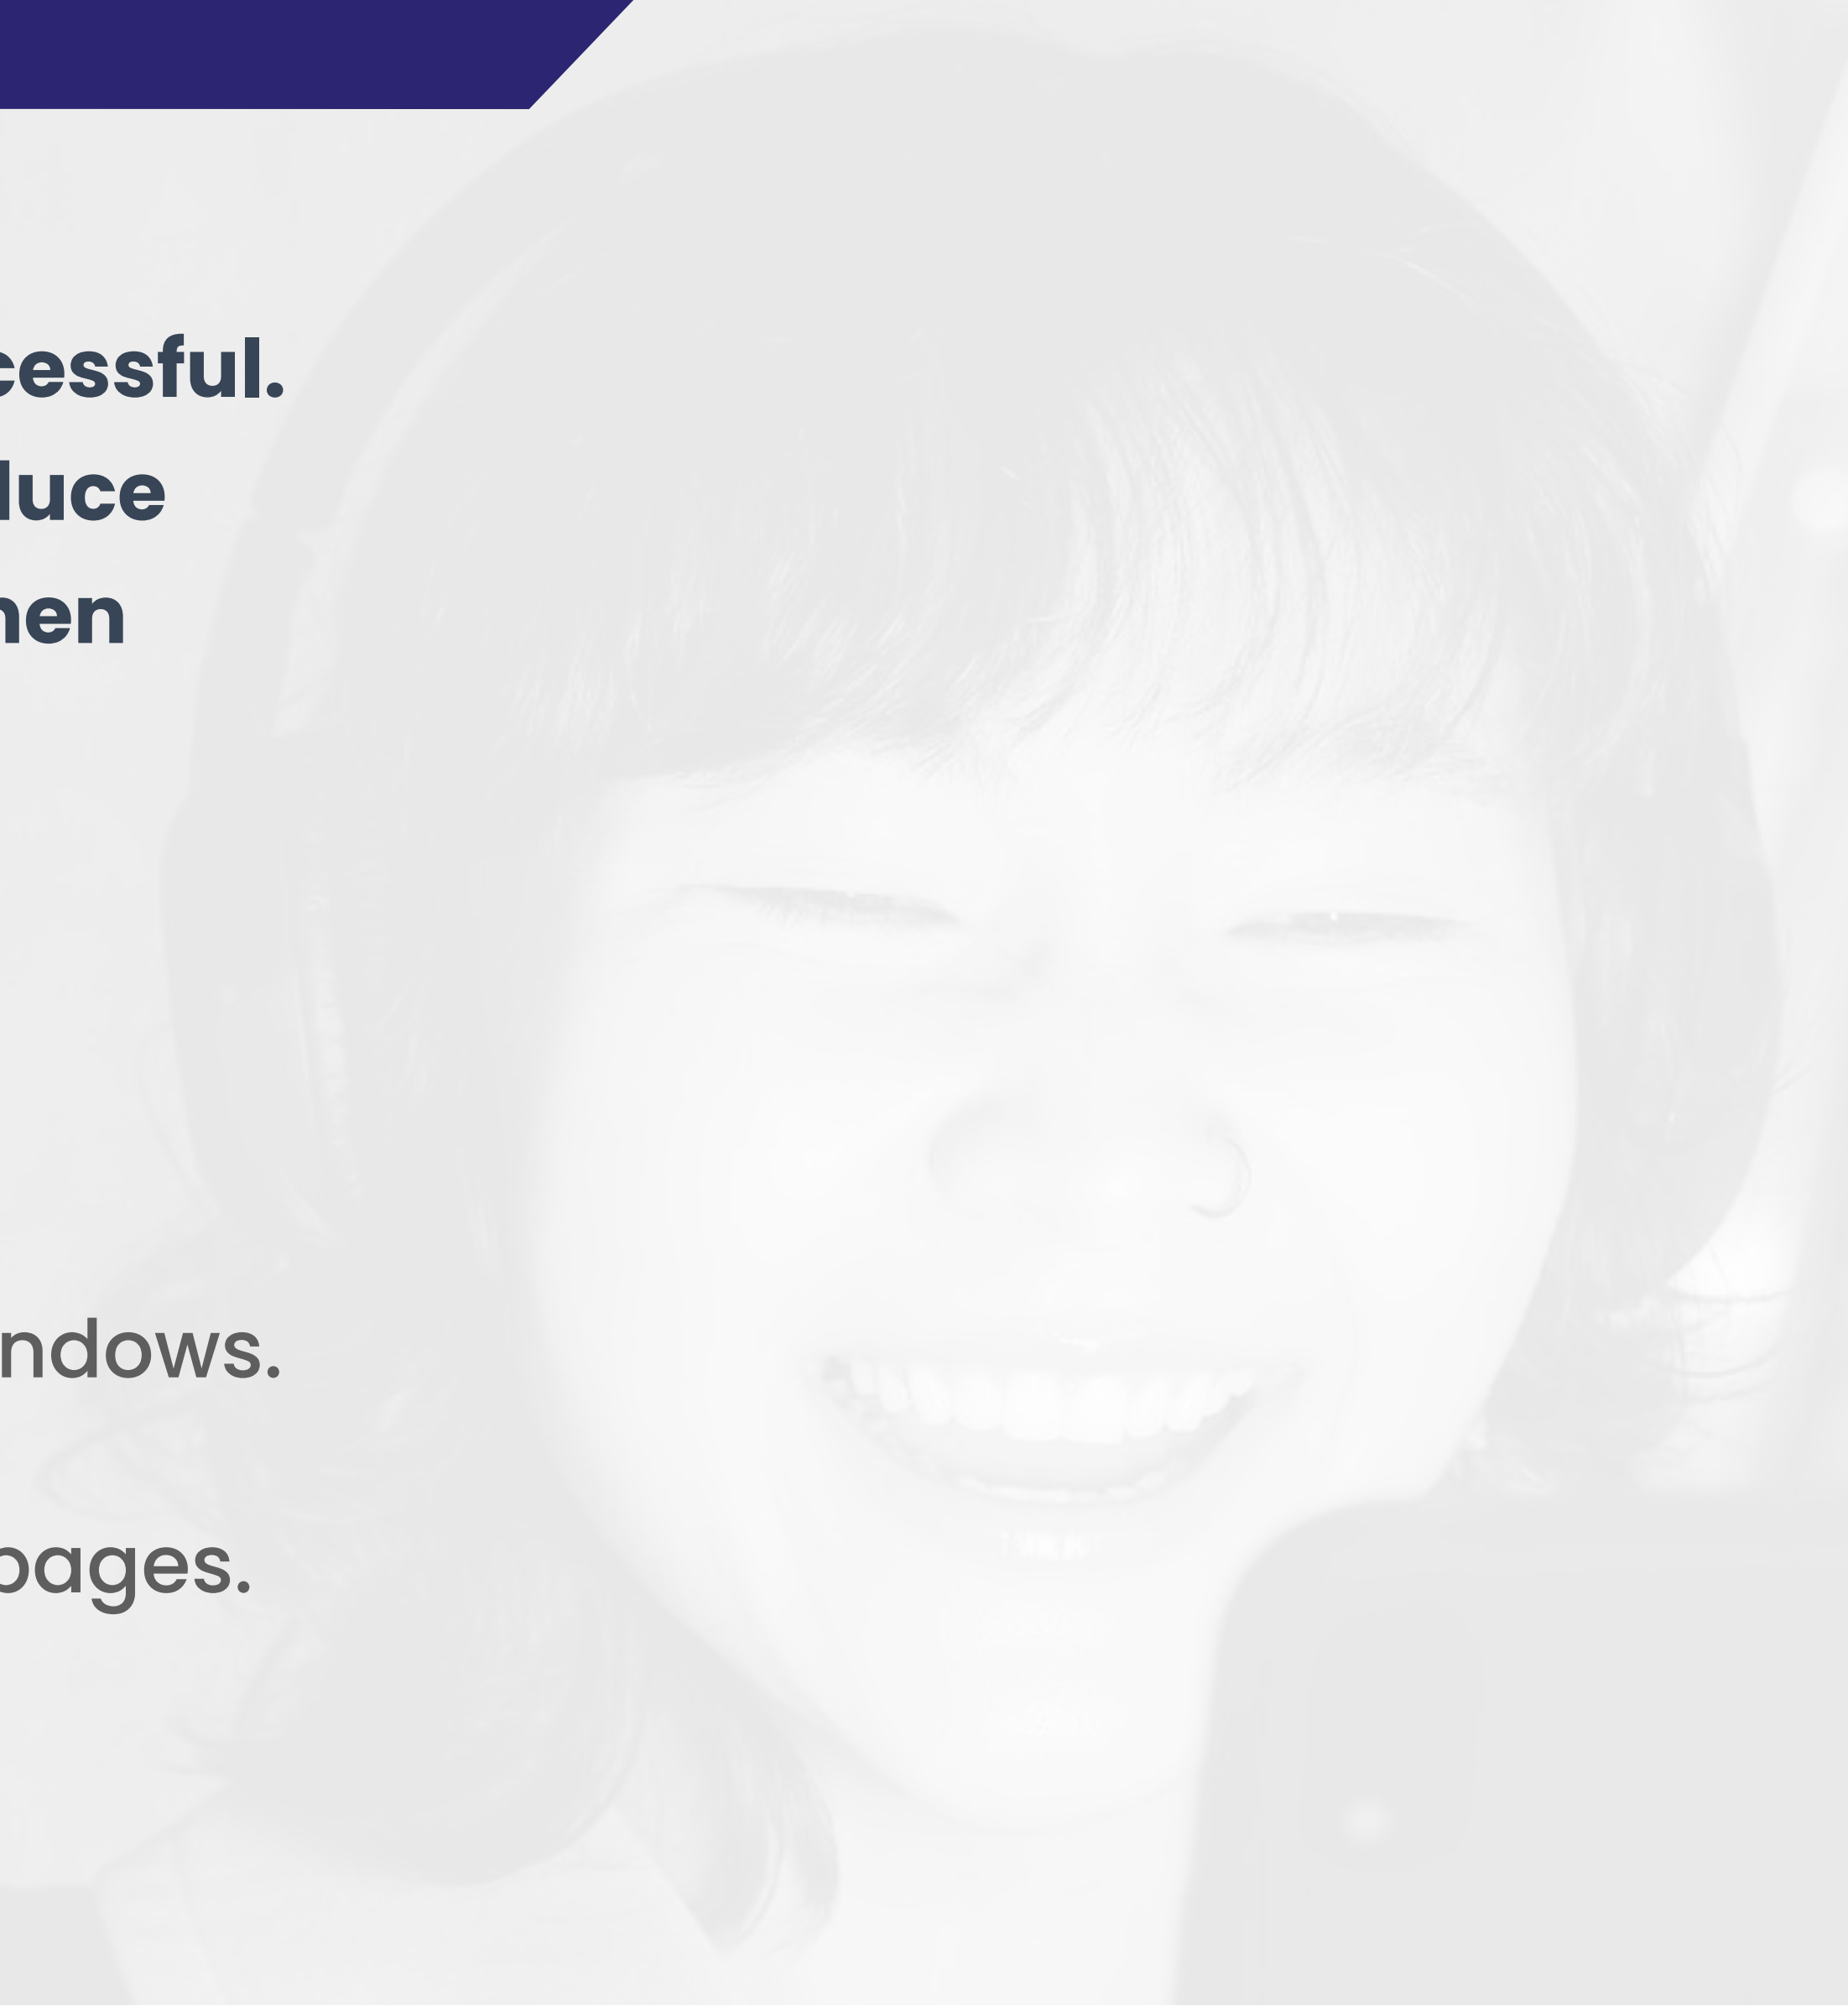

- **Time and observe** the **latency** of how long it takes the user to sign up, the **frequency** of clicking through the app, and the **duration** data of how long it takes the user to maneuver the app (as someone signing up and/or as someone logging in).
- Observe the **emotional steps** the user may experience ( e.g., frustrated with a screen or button).
- Maintain both an objective and subjective approach as we ask for **feedback** at the end of the **user's experience** during the testing process.

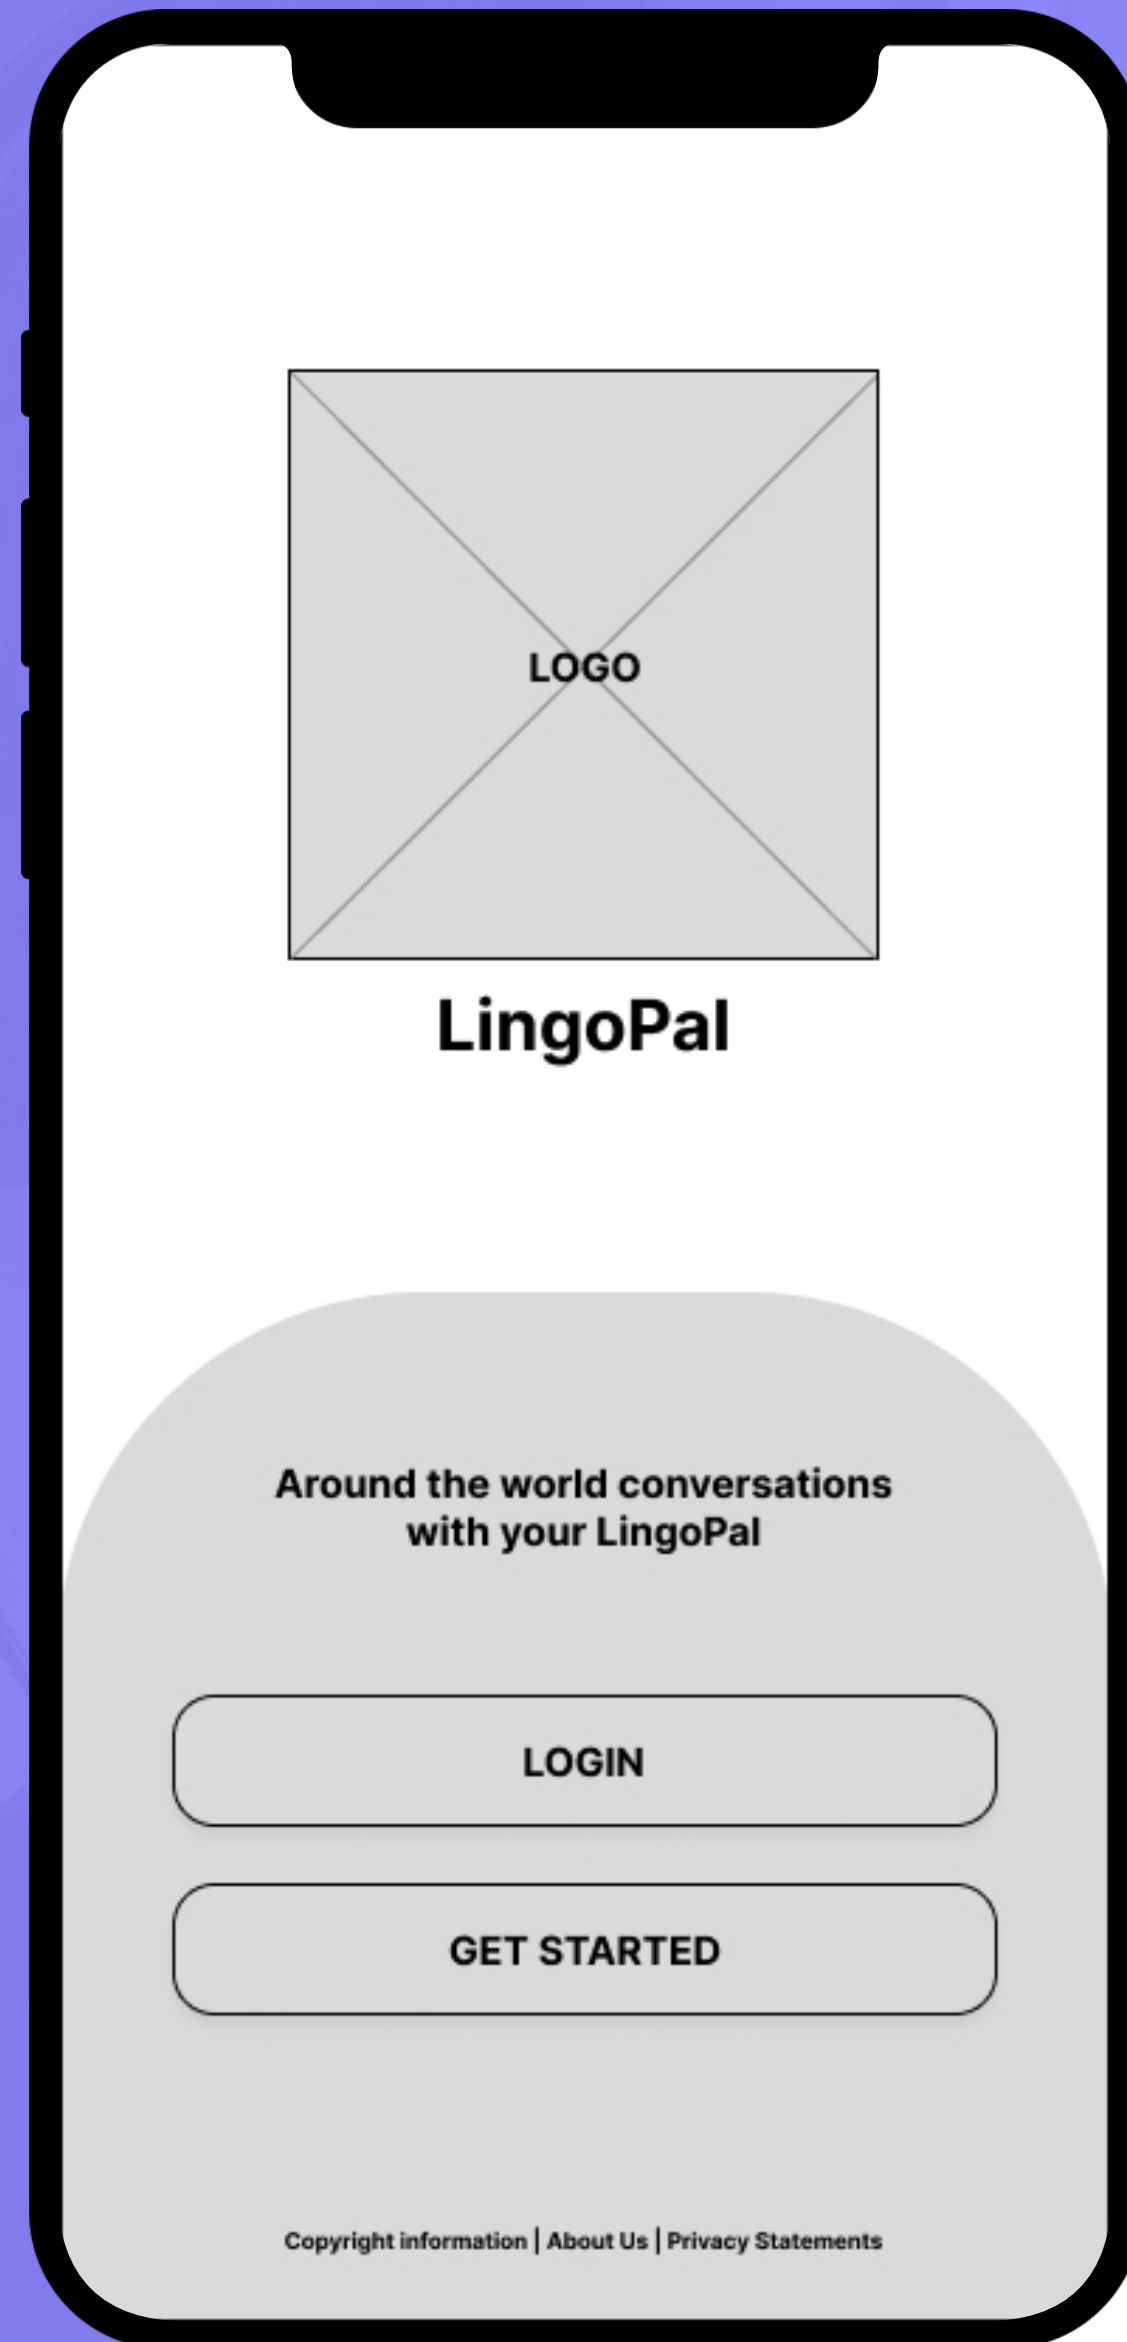

# Prototype Testing Results

**Our metrics indicate that the prototype was successful. Both UX and UI improvements are required to reduce the number of clicks and decrease frustration when navigating the app.**

- Making the About LingoPal a visible link.
- Making the language choice more visible
- Making the opt-in options full-screen pop-up windows.
- And Adding a skip option to the personalization pages.

# LingoPal

Demo

# Next Steps

- Return to the empathy phase to complete a competitive analysis
- Possibly return to the ideation and prototyping phases
- If there are enough unique elements within our platform, we would return to user testing on our prototype based on the most recent iterated prototype

# High Fidelity Prototype
